Technical Skills

- **Languages & Frameworks:** Python, Go, JavaScript, TypeScript, Solana, HTML, CSS, and TailwindCSS
- **Tools & Platforms:** Firebase and Supabase, LaTeX

Projects

- **Landing for Asuga Nodes:** Read, write, and build onchain with blazing-fast RPCs, real-time streams, and developer-first APIs — all backed by Solana's most dependable infrastructure.
- **Dashboard for Asuga Nodes:** Dashboard to manage your NFT and nodes from Asuga Nodes.
- **Ashes & Ink:** Classics publishing, connected to WoofPress.
- **BugsArchive:** A site for writings about computer science from volunteers, with no frontend use of JavaScript, that can be read on almost any sort of browser (including terminal based web browsers), with nothing but content.
- **Woof OS:** Woof OS is a simple respin of Arch Linux with a focus on simplicity and speed.
- **Gamma Tech Suite Bot:** A Discord bot to view analytics about tokens on Solana.
